Communication Plan

Date: 26 October 2026 **Team ID:** _____
Project Name: Electric Vehicle Market Performance & Insights
Maximum Marks: 1 Mark

This plan describes the communication approach for the individual EV analytics project. The project is completed by one member, Abhijeet Singh Vashishthe. Team ID is intentionally left blank. Channels below are suitable for coordinating project work and sharing progress and deliverables.

Communication Plan

S.No	Communication Type	Frequency	Channel / Tool	Participants	Purpose
1	Team Standup	Daily / when working	Personal task checklist; project notes	Abhijeet Singh Vashishthe	Review the day's tasks, priorities and blockers.
2	Progress Update	Weekly	Project notes; GitHub repository	Abhijeet Singh Vashishthe; instructor / reviewer when required	Summarise completed work, pending tasks and next steps.
3	Issue / Bug Discussion	As Needed	Tableau Public; GitHub Issues / notes	Abhijeet Singh Vashishthe; instructor / reviewer if guidance is needed	Record chart, data, publishing or website issues and their resolution.
4	Stakeholder Review	Bi-Weekly / at milestones	Published website; Tableau dashboard and stories	Abhijeet Singh Vashishthe; instructor / evaluator	Review whether the dashboard answers the project questions and is understandable.
5	Final Demo Rehearsal	Once before submission	Website and Tableau Public; screen recording	Abhijeet Singh Vashishthe	Check navigation, dashboard, both stories and presentation flow.
6	Final Submission Update	At submission	SkillWallet / course submission portal	Abhijeet Singh Vashishthe; evaluator	Submit report, repository, website, Tableau links and required evidence.

Communication Challenges & Resolutions

The entries below document practical project communication and coordination considerations; they are not claims of formal team meetings or stakeholder interviews.

S.No	Challenge Faced / Consideration	Resolution / Action Taken
1	Keeping project information and deliverable links organised.	Maintained a central GitHub repository and public website, with direct links to the Tableau dashboard and both stories.
2	Explaining charts without overstating what the supplied test dataset represents.	Added methodology notes describing missing values and clarifying that record counts are not global market share or factory output.
3	Checking that the published dashboard, stories and website are ready for review.	Used the published Tableau URLs and GitHub Pages site as review points; final submission evidence and demo recording should be checked before submission.
