Demonstration of Proposed Features

Date: 26 October 2026 **Team ID:** _____
Project Name: Electric Vehicle Market Performance & Insights
Maximum Marks: 1 Mark

This document records the main features planned and delivered for the individual EV analytics project. Team member: Abhijeet Singh Vashishthe. Team ID is intentionally left blank. Status is based on the project deliverables and published Tableau / website links supplied for this project.

Demonstration of Proposed Features

S.No	Feature Name	Description	Status	Demonstrated	Remarks
1	Dataset connection and preparation	Connected the supplied ev_market_test.csv dataset to Tableau and reviewed data quality, missing values and duplicate records.	Implemented	Yes	34,259 rows and 37 columns profiled; missing values retained as unknown.
2	Eight EV visualisations	Created views for manufacturer sales, battery technology, range, capacity vs range, country records, customer ratings, capacity by battery type and sales by model year.	Implemented	Yes	Eight visualisations included in the Tableau project.
3	Interactive Tableau dashboard	Combined the visualisations into one dashboard for exploration of EV market and technology indicators.	Implemented	Yes	Published on Tableau Public.
4	Dashboard filters and exploration	Provided available dashboard filtering by dimensions such as manufacturer, model year, battery type, country and category where configured.	Implemented	Yes	Filter availability depends on the published workbook configuration.
5	Two Tableau stories	Published Story 1: EV Market Performance Overview and Story 2: EV Technology and Customer Insights.	Implemented	Yes	Both story links are included below.
6	Public project website	Published a GitHub Pages website linking the project overview, Tableau dashboard and both stories.	Implemented	Yes	Website and source repository are publicly accessible.

Feature Implementation Summary

Total Features Proposed	6
Total Features Implemented	6
Total Features Demonstrated	6
Overall Implementation Rate (%)	100%
